PROCESSING TECHNOLOGY FRESH CARROTS

GENERAL

Constructie Bruynooghe has a long term history in the supply of complete processlines for fresh carrots. In our range we can deliver lines or individual machines from 5 up to 25 tons per hour.

Our machines are simple in operation and of the highest quality. In our latest developments we included new features and we adapt constantly our designs according our customers experience and advice. Our complete range can be designed in a flexible way and delivered at different sizes.

We are a family business with 45 experienced employees that are building processlines for vegetables since 1976. Based in the South-West of Belgium, we realise a turn-over of 8 million Euro and export worldwide. We keep our experience indoors and have proper trained salesmen, engineers, constructors and mounting crews. All machines are build in our modern equipped workshop where we are able to assemble complete lines, since we have big and high buildings.

PRODUCTS

Our range of machines to process fresh carrots:
